Xintegu Video introduction

Shenzhen Xintegu Hardware Co., Ltd. is a new hardware enterprise integrating the design, development, manufacturing and sales of fasteners, non-standard customized parts, precision hardware and difficult hardware. The founder Lin Yibo has 15 years of experience in production, sales and design in the industry. Due to the rapid development of the company, moved to Fenggang Town, Dongguan, the capital of precision hardware in Pearl River Delta, in 2019. The production and sales base has a total area of 4500m², more than 280 sets of advanced equipment, and an annual output value of more than 87 million yuan.

Existing equipment of the company: standard cold pier machine, multi position cold pier machine, automatic lathe, CNC lathe, spindle rubbing machine, drilling and tapping machine, screw selection machine and automatic packaging equipment, etc. All kinds of testing equipment and certificates are complete, and they have been certified by ISO9001 quality management system, International authority SGS field certification and enterprise credit rating 3A certification.

With strong production and supporting capacity, it has provided one-stop service for more than 2000 domestic and foreign enterprises, and its products are widely distributed in Europe, South America, North America, Southeast Asia, the Middle East and other countries and regions.

Xintegu of advantages :

1. The variety of equipment, the smallest screw we can do the diameter of 0.5mm, large screws can be 12mm diameter. The precision of automatic lathe and CNC lathe can reach 0.002mm, diameter 1.2-80mm.

2. Powerful production capacity, daily output value can reach 50 tons.

3. R & D capabilities : R & D director has 30 years of Hardware Technology, equipment independent R & D capabilities, has developed a multi-functional anti-loosening screws, anti-loosening gasket and anti-loosening nuts and automatic assembly of anti-loosening nuts automation equipment, and is applying for a patent.

4. Familiar with all kinds of processing technology of hardware. Some automatic lathe parts can be replaced by cold pier, or processed outside after cold pier, which saves processing cost and shortens processing time.

5. Perfect management system to ensure that every product is boutique.

With the rapid development of the market and the variety of customer needs, Shenzhen Xintegu Hardware Co., Ltd. strives to create the most complete and advanced processing technology and equipment, and wholeheartedly provides customers with competitive prices, guaranteed quality, and guaranteed delivery of One-stop procurement and solving various 'difficult' non-standard parts and fasteners !

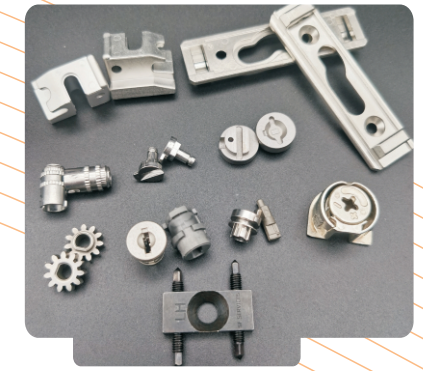

Xintegu: Innovate the intelligent manufacturing of hardware and face the development of the world.
